No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1984 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 232

NUMBER 1, JULY 1984

COMMUNICATION

- Some Species of Human Leukocyte Interferon Are Glycosylated
James E. Labdon, Kenneth D. Gibson, Shaiu Sun, and Sidney Pestka 422

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

- A Near-Infrared Investigation of Cytochrome *c* Oxidase in Higher Plant Mitochondria
Pierre Richaud and Michel Denis 8
- Dissociation of NAD(P)⁺-Stimulated Mitochondrial Ca²⁺ Efflux from Swelling and Membrane Damage
Anibal E. Vercesi 86
- Formation of Novel Nitrofurane Metabolites in Xanthine Oxidase-Catalyzed Reduction of Methyl 5-Nitro-2-furoate
Hideyuki Yamada, Kiyoshi Tatsumi, Yuichi Kawazoe, and Hidetoshi Yoshimura 234
- Prevention by 3-*N*-Ribosyluric Acid of the Oxidation of Bovine Hemoglobin by Sodium Nitrite
Robert C. Smith and Vic Nunn 348
- The Oxidation of External NADH by an Intermembrane Electron Transfer in Mitochondria from the Ubiquinone-Deficient Mutant E3-24 of *Saccharomyces cerevisiae*
Aurelio De Santis and Bruno Andrea Melandri 354

ENZYME MECHANISMS AND METABOLISM

- Rat Liver Pyruvate Kinase: Influence of Ligands on Activity and Fructose 1,6-Bisphosphate Binding
James B. Blair and Robert G. Walker 202
- Mg²⁺- or Mn²⁺-Dependent *p*-Nitrophenylphosphatase Activity Is Present in Ehrlich Ascites Tumor Cells
Indu Javeri, Janet Maxwell, Ola Mae Zack Howard, Stanley Yunker, and Steven G. O'Neal 214

GLYCOPROTEINS AND GLYCOLIPIDS

- The Similar Effects of Swainsonine and Locoweed on Tissue Glycosidases and Oligosaccharides of the Pig Indicate that the Alkaloid is the Principal Toxin Responsible for the Induction of Locoism
D. R. P. Tulsiani, H. P. Broquist, L. F. James, and O. Touster 76
- Subcellular Distribution of the Mannan-Binding Protein and Its Endogenous Inhibitors in Rat Liver
Kazutoshi Mori, Toshisuke Kawasaki, and Ikuo Yamashina 223
- Isolation and Characterization of a Novel Disialoganglioside from Bovine Adrenal Medulla
Toshio Ariga, Michiko Sekine, Robert K. Yu, and Tadashi Miyatake 305
- Presence of a Nonlysosomal Endo- β -*N*-acetylglucosaminidase in the Cellular Slime Mold *Dictyostelium discoideum*
Hudson H. Freeze and James R. Etchison 414

HORMONE STRUCTURE AND FUNCTION

- Effect of Diethylpyrocarbonate on the Biological Activities of Botulinum Neurotoxin Types A and E *Bibhuti R. Dasgupta and Stuart Rasmussen* 172
- Evidence for the Synthesis of Multiple Pro-opiomelanocortin-like Precursors in Murine Leydig Tumor Cells *Michael H. Melner and David Puett* 197
- The Capacity of Chondrocytes to Respond to Serum Is Enhanced by Organ Culture in the Absence of Serum, Stimulated by Serum, and Modified by Ascorbate *Paul D. Benya, Stuart Jaffe, and Anthony Raffo* 323

LIPIDS AND PROSTAGLANDINS

- Modulation of Platelet-Activating Factor (PAF) Synthesis and Release from Human Polymorphonuclear Leukocytes (PMN): Role of Extracellular Ca^{2+} *Janet C. Ludwig, Linda M. McManus, Phillip O. Clark, Donald J. Hanahan, and R. Neal Pinckard* 102
- The Role of Lysophosphatidylcholine in Lipid Synthesis by Developing Sunflower (*Helianthus annuus* L.) Seed Microsomes *Colin P. Rochester and David G. Bishop* 249
- Differential Activation of Membrane Phospholipid Turnover by Compound 48/80 and Ionophore A23187 in Rat Mast Cells *Atsushi Imai, Yasuhiro Ishizuka, Shigeru Nakashima, and Yoshinori Nozawa* 259

MEMBRANES, CELL SURFACES, AND RECEPTORS

- Developmental Changes in Insulin Receptors of Pig Red Blood Cells *Jeong Hyok Im, Robert B. Zeidler, Charles E. Rackley, and Hyun Dju Kim* 26
- Biochemical and Morphological Characterization of a Plasma Membrane-Enriched Fraction from Bovine Parathyroid Cells *Federica I. Wolf, Jean Wallace, Clara Franzini-Armstrong, and Antonio Scarpa* 92
- Nonuniform Loss of Membrane Glycoconjugates during *in Vivo* Aging of Human Erythrocytes: Studies of Normal and Diabetic Red Cell Saccharides *Kiyoshi Miyahara and Mary Jane Spiro* 310
- Mg^{2+} Adenosine Triphosphatase from Cell Envelopes of Free-Living and Bacteroid Forms of *Rhizobium lupini* Strain NZP2257 *John G. Robertson, Jan E. Thomas, Linda R. Gowing, and Michael J. Boland* 337
- Rabbit Heart Mitochondrial Hexokinase: Solubilization and General Properties *E. Aubert-Foucher, B. Font, and D. C. Gautheron* 391
- Infrared Spectroscopic Studies on Interactions of Water and Carbohydrates with a Biological Membrane *John H. Crowe, Lois M. Crowe, and Dennis Chapman* 400

MOLECULAR GENETICS, DEVELOPMENTAL BIOCHEMISTRY, AND DIFFERENTIATION

- Endogenous Substrates for *in Vitro* Phosphorylation by Cyclic AMP-Dependent Protein Kinase from *Dictyostelium discoideum* *Lynn T. Frame and Charles L. Rutherford* 47

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- Autocatalytic Inactivation of Plant Cytochrome P-450 Enzymes: Selective Inactivation of the Lauric Acid In-Chain Hydroxylase from *Helianthus tuberosus* L. by Unsaturated Substrate Analogs
Jean-Pierre Salaun, Daniele Reichhart, Annick Simon, Francis Durst, Norbert O. Reich, and Paul R. Ortiz de Montellano 1
- Characteristics of b-Type Cytochromes in Brain Microsomes: Comparison with Liver Microsomes
Satoshi Yoshida, Toshitsugu Yubisui, and Masazumi Takeshita 296
- Superoxide Generation by NADPH-Cytochrome P-450 Reductase: The Effect of Iron Chelators and the Role of Superoxide in Microsomal Lipid Peroxidation
L. A. Morehouse, C. E. Thomas, and S. D. Aust 366
- The Role of Iron Chelates in Hydroxyl Radical Production by Rat Liver Microsomes, NADPH-Cytochrome P-450 Reductase and Xanthine Oxidase
Gary W. Winston, Dennis E. Feerman, and Arthur I. Cederbaum 378
- Rat Liver DT-Diaphorase: Regulation of Functional mRNA Levels by 3-Methylcholanthrene, *trans*-Stilbene Oxide, and Phenobarbital
Jacinta B. Williams, Regina Wang, Anthony Y. H. Lu, and Cecil B. Pickett 408

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

- Comparative Studies on Calotropins DI and DII from the Latex of *Calotropis gigantea*
A. Sengupta, D. Bhattacharya, G. Pal, and N. K. Sinha 17
- Stereochemical Determination of Carbon Partitioning between Photosynthesis and Photorespiration in C₃ Plants: Use of (3*R*)-D-[3-³H, 3-¹⁴C]Glyceric Acid
Kenneth R. Hanson 58
- The Extent to which the Spatial Separation between Photosystems I and II Associated with Granal Formation Limits Noncyclic Electron Flow in Isolated Lettuce Chloroplasts
W. S. Chow 162
- Phytoalexin Synthesis in Soybean Cells: Elicitor Induction of Phenylalanine Ammonia-lyase and Chalcone Synthase mRNAs and Correlation with Phytoalexin Accumulation
Jürgen Ebel, Walter E. Schmidt, and Rosemarie Loyal 240
- Complete Primary Structure of Ribulosebisphosphate Carboxylase/Oxygenase from *Rhodospirillum rubrum*
Fred C. Hartman, Claude D. Stringer, and Eva H. Lee 280

PROTEIN STRUCTURE AND FUNCTION

- The Isoinhibitors of Chymotrypsin/Elastase from *Ascaris lumbricoides*: Isolation by Affinity Chromatography and Association with the Enzymes
Robert J. Peanasky, Yvonne Bentz, Brad Paulson, David L. Graham, and Donald R. Babin 127
- The Isoinhibitors of Chymotrypsin/Elastase from *Ascaris lumbricoides*: The Reactive Site
Robert J. Peanasky, Yvonne Bentz, Gene A. Homandberg, Steven T. Minor, and Donald R. Babin 135
- The Isoinhibitors of Chymotrypsin/Elastase from *Ascaris lumbricoides*: The Primary Structure
Donald R. Babin, Robert J. Peanasky, and Susan M. Goos 143

REGULATION OF METABOLISM AND OF ENZYME ACTION

<i>N</i> -Acetylglutamate-Independent Activity of Carbamyl Phosphate Synthetase (Ammonia): Implications for the Kinetic Assay of Acetylglutamate	38
<i>Natalie S. Cohen</i>	
Phosphorylation and Inactivation of Rabbit Skeletal Muscle Glycogen Synthase: Distinction between Kinase Fa-, Phosphorylase Kinase-, and Glycogen Synthase (Casein) Kinase-1-Catalyzed Reactions	111
<i>Kuo-Ping Huang, Toolsee J. Singh, Akira Akatsuka, Shelley G. Shapiro, Jackie R. Vandenheede, and Wilfried Merlevede</i>	
Relation of the Extra-Sequence of the Precursor Form of Chicken Liver δ -Aminolevulinate Synthase to Its Quaternary Structure and Catalytic Properties	118
<i>Norimichi Watanabe, Norio Hayashi, and Goro Kikuchi</i>	
Effect of Acetaldehyde and Cyanamide on the Metabolism of Formaldehyde by Hepatocytes, Mitochondria, and Soluble Supernatant from Rat Liver	179
<i>Elisa Dicker and Arthur I. Cederbaum</i>	
The Catalytic Effect of Tyrosinase upon Oxidation of 2-Hydroxyestradiol in Presence of Catechol	189
<i>Gert M. Jacobsohn and Myra K. Jacobsohn</i>	
Characterization of Bovine Brain Calmodulin-Dependent Protein Phosphatase	269
<i>E. Ann Tallant and Wai Yiu Cheung</i>	

NUMBER 2, AUGUST 1, 1984

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Loose Binding of Testicular Mitochondrial ATPase to the Inner Membrane	441
<i>Marta Elisa Vázquez-Memije, Alfonso Cárabez-Trejo, Graciela Gallardo-Trillanes, and Graciela Delhumeau-Ongay</i>	
Hypothesis—A Chemical Mechanism for the Biosynthesis of ATP Involving Ion-Exchange Reactions	496
<i>W. Terry Jenkins, Millie M. Marshall, and Alfred S. Lewin</i>	
Vanadate and Molybdate Stimulate the Oxidation of NADH by Superoxide Radical	562
<i>Douglas Darr and Irwin Fridovich</i>	
Discrimination between the Binding Sites of Modulators of the H^+ -Translocating ATPase Activity in Rat Liver Mitochondrial Membranes	610
<i>M. D. Partis, D. G. Griffiths, and R. B. Beechey</i>	
Effects of ATP on Various Steps Controlling the Rate of Oxidative Phosphorylation in Newborn Rat Liver Mitochondria	670
<i>Loris Baggetto, Danièle C. Gautheron, and Catherine Godinot</i>	

ENZYME MECHANISMS AND METABOLISM

Nitro Analogs of Substrates for Argininosuccinate Synthetase and Argininosuccinate Lyase	520
<i>Frank M. Raushel</i>	

GLYCOPROTEINS AND GLYCOLIPIDS

Conformation of the Antifreeze Glycoprotein of Polar Fish	624
<i>C. Allen Bush, Suresh Ralapati, Gerald M. Matson, R. Bryan Yamasaki, David T. Osuga, Yin Yeh, and Robert E. Feeney</i>	

- 4-Methylumbelliferyl-Glycosides as Fluorescence Probes of Sugar-Binding Sites on Lectin Molecules: Spectral Properties and Dependence of Fluorescence on Polarity and Viscosity
Monique Decastel, Michel Vincent, Khushi L. Matta, and Jean-Pierre Frénoy 640
- Reductive Cleavage of Xaa-Proline Peptide Bonds by Mild Alkaline Borohydride Treatment Employed to Release O-Glycosidically Linked Carbohydrate Units of Glycoproteins
Michio Shimamura, Yasuo Inoue, and Sadako Inoue 699

HORMONE STRUCTURE AND FUNCTION

- N^{α} -Malto-Glucagon and N^{α} -Malto, S-Methyl Methionine²⁷-Glucagon: Preparation and Characterization of Two Partial Agonists
Sharon A. Coolican and Ruth S. Gurd 450

LIPIDS AND PROSTAGLANDINS

- sn*-Glycerol-3-phosphate Acyltransferase in a Particulate Fraction from Maturing Safflower Seeds
Ken'Ichi Ichihara 685

MEMBRANES, CELL SURFACES, AND RECEPTORS

- Acetylglceryl Ether Phosphorylcholine (AGEPC; Platelet-Activating Factor)-Induced Stimulation of Rabbit Platelets: Correlation between Phosphatidic Acid Level, ⁴⁵Ca²⁺ Uptake, and [³H]Serotonin Secretion
Shivendra D. Shukla and Donald J. Hanahan 458
- Molecular Dynamics of 3,3',5-Triiodo-L-thyronine in Model Membranes: A Spin Label Study
Ching-San Lai and Sheue-Yann Cheng 477
- Properties of a Phosphorylated Intermediate of the Ca,Mg-Activated ATPase of Microsomal Vesicles from Uterine Smooth Muscle
Mary E. Carsten and Jordan D. Miller 616

MOLECULAR GENETICS, DEVELOPMENTAL BIOCHEMISTRY, AND DIFFERENTIATION

- Induction of Cytochrome P-450 mRNAs Quantitated by *in Vitro* Translation and Immunoprecipitation
Engin M. Gozukara, John Fagan, Jullia V. Pastewka, F. Peter Guengerich, and Harry V. Gelboin 660
- Changes in Adenylate Cyclase and Phosphodiesterase Activities during the Growth Cycle of Adult Rat Hepatocytes in Primary Culture
Pushkaraj J. Lad, Enrique Blazquez, Michael Lin, and Hyam L. Leffert 679

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- Role of the Electron Transfer System in Microsomal Drug Monooxygenase Reaction Catalyzed by Cytochrome P-450
Hisaaki Taniguchi, Yoshio Imai, and Ryo Sato 585
- Inhibition of Indoleamine 2,3-Dioxygenase and Tryptophan 2,3-Dioxygenase by β -Carboline and Indole Derivatives
Naomi Eguchi, Yasuyoshi Watanabe, Kazuko Kawanishi, Yohei Hashimoto, and Osamu Hayaishi 602

PHYSICAL BIOCHEMISTRY

- Proton Chemical Shifts in Fluorocinnamate-Chymotrypsin Complexes
J. T. Gerig and B. A. Halley 467
- Sedimentation Equilibrium Studies on the Interaction between Cytochrome *c* and Cytochrome *c* Peroxidase
Robert J. Dowe, Lidia B. Vitello, and James E. Erman 566
- Free Radicals from Eumelanins: Quantum Yields and Wavelength Dependence
T. Sarna and R. C. Sealy 574
- A Carbon-13 NMR Comparative Study of Metal Ion Substitutions in Human Carbonic Anhydrase I Carboxymethylated at Active-Site Histidine-200
Raja G. Khalifah and Pamela Jeffers Morley 632

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

- Isolation of Protein(s) Containing Chloride Ion Transport Activity from Thylakoid Membranes
Vida Vambutas, Diana S. Beattie, and Robert Bittman 538

PROTEIN STRUCTURE AND FUNCTION

- Proline-Containing β -Turns in Peptides and Proteins: Analysis of Structural Data on Globular Proteins
V. S. Ananthanarayanan, Samir K. Brahmachari, and N. Pattabiraman 482
- Effect of Ferrate, a Site-Specific Phosphate Analog, on Human Deoxyhemoglobin
Janusz Steczko, Bernard Axelrod, and Mark Hermodson 597
- Modification of α -Crystallin Subunit Chains and Formation of α -Neoprotein Molecules: Role of SH Groups
K. Malinowski and W. Manski 721

PROTEIN SYNTHESIS AND POST-TRANSLATIONAL PROCESSING

- Isolation and Characterization of a Translation Inhibitor from Human Term Placenta
Mark S. Eller, Richard E. Cullinan, and Peter M. McGuire 526
- Effects of Compactin on the Levels of 3-Hydroxy-3-methylglutaryl Coenzyme A Reductase in Compactin-Resistant C100 and Wild-Type Cells
Edna C. Hardeman, Akira Endo, and Robert D. Simoni 549

PROTEOLYSIS AND PROTEIN TURNOVER

- Two Cytosolic, Ca^{2+} -Dependent, Neutral Proteinases from Rabbit Liver: Purification and Properties of the Proenzymes
E. Melloni, S. Pontremoli, F. Salamino, B. Sparatore, M. Michetti, and B. L. Horecker 505
- Regulation of the Ca^{2+} -Dependent Neutral Proteinases from Rabbit Liver by an Endogenous Inhibitor
E. Melloni, F. Salamino, B. Sparatore, M. Michetti, S. Pontremoli, and B. L. Horecker 513

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Association-Dissociation of Mammalian Brain Glutamine Synthetase: Effects of Metal Ions and Other Ligands
Robert B. Denman and Frederick C. Wedler 427
- Activation of Phosphofructokinase from Rat Tissues by 6-Phosphogluconate and Fructose 2,6-Bisphosphate
James Sommercorn, Tina Steward, and Richard A. Freedland 579

Effects of Glucose Oligomers on the Glycogen Levels of Isolated Hepatocytes	
<i>Liora Lichtenberg, Roberta G. Sugg, and Carlos Villar-Palasi</i>	654
Occurrence of Protein Kinases NI and NII in Human and Porcine Thyroids	
<i>Masaaki Inaba, Noboru Hamada, Jun-ichi Yamakawa, Kunihiko Ito, Hirotohi Morii, Munehiko Yukioka, Seiji Morisawa, and Akira Inoue</i>	707
Purification and Characterization of a Protein Inhibitor of Calcium-Dependent Proteases from Rat Liver	
<i>George N. Demartino and Dorothy E. Croall</i>	713
AUTHOR INDEX FOR VOLUME 232	729

The Subject Index for Volume 232 will appear in the December 1984 issue as part of a cumulative index for the year 1984.

Digitized by the Internet Archive
in 2026

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1980. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255-260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
